Free Standing Enclosure, phase 1 (no tanks, no backlight): DRAFT modular order

Scene `free-standing-enclosure-991056`: Free Standing Enclosure (Vault file-version 991056) native snapshot. Document `free-standing-enclosure-phase-1-draft`. Generated 2026-10-23T15:40:42Z.

DRAFT

Review state: draft. This sequence has not been physically validated and the order is a draft to be corrected after the build.

Build scope phase-1: Enclosure without tanks and backlight (decided by Peter, 2026-10-22; draft). 110 of 155 installed occurrences are in this build, 42 conditional (undecided), 3 deferred; CAD counts are unchanged and the deferred items stay in the model.

Phase note: Phase 1 assembles the frame, casters, panels with handles, toggle clamps, lower supports, camera frame and top panel. Deferred items stay in the CAD scene and in the CAD counts; this file only scopes the build and its documentation.

Backlight: no modeled part is identified as the backlight or light box; nothing further is excluded until Peter names the occurrences

Deferred design: monitor supports and acrylic; bowls and bowl frame; tank frame changes.

Geometry and hierarchy come from the CAD export named in the build record. Quantities are CAD instance counts, not purchase quantities, kits, stock or an approved bill of materials.

Project note: The tank(s) and the lower light box are to be replaced in the modified build by two Alienware AW2725Q monitors under an acrylic panel and bowl frames (Peter, 2026-10-22; intent, not a designer confirmation; the light-box occurrences are not yet identified). CAD counts are unchanged.

Subassembly pages and joint close-ups are inspection views of parts at their CAD positions; they are not assembly steps and imply no sequence, fasteners or tool access.

Supplementary items (20 rows, 16 for the existing design, 4 for new design in the appendix only) are hardware not modelled in CAD: listed separately for review, never added to CAD quantities, unknown quantities left unknown; not an approved bill of materials.

CAD ambiguity: 1 pair(s) of occurrences of the same part share one position (SHULZE 2W.353 TANK). All source instances are kept and counted; review the intended configuration before treating the count as stock.

Approach arrows are unverified render hints; they do not prove an insertion path or tool access.

Stock is unknown until counted and recorded (on_hand_each with counted_by and counted_date). The counted box is for a paper count only.

Finished assembly

Figure 1: All parts at their CAD positions.

Subassemblies, drawn apart

exploded illustration: the top-level groups moved apart as rigid bodies by the recorded offsets; not an assembly step, no order, fastener or tool access implied. The numbers are the subassembly pages of this document, one callout per subassembly on one of its instances.

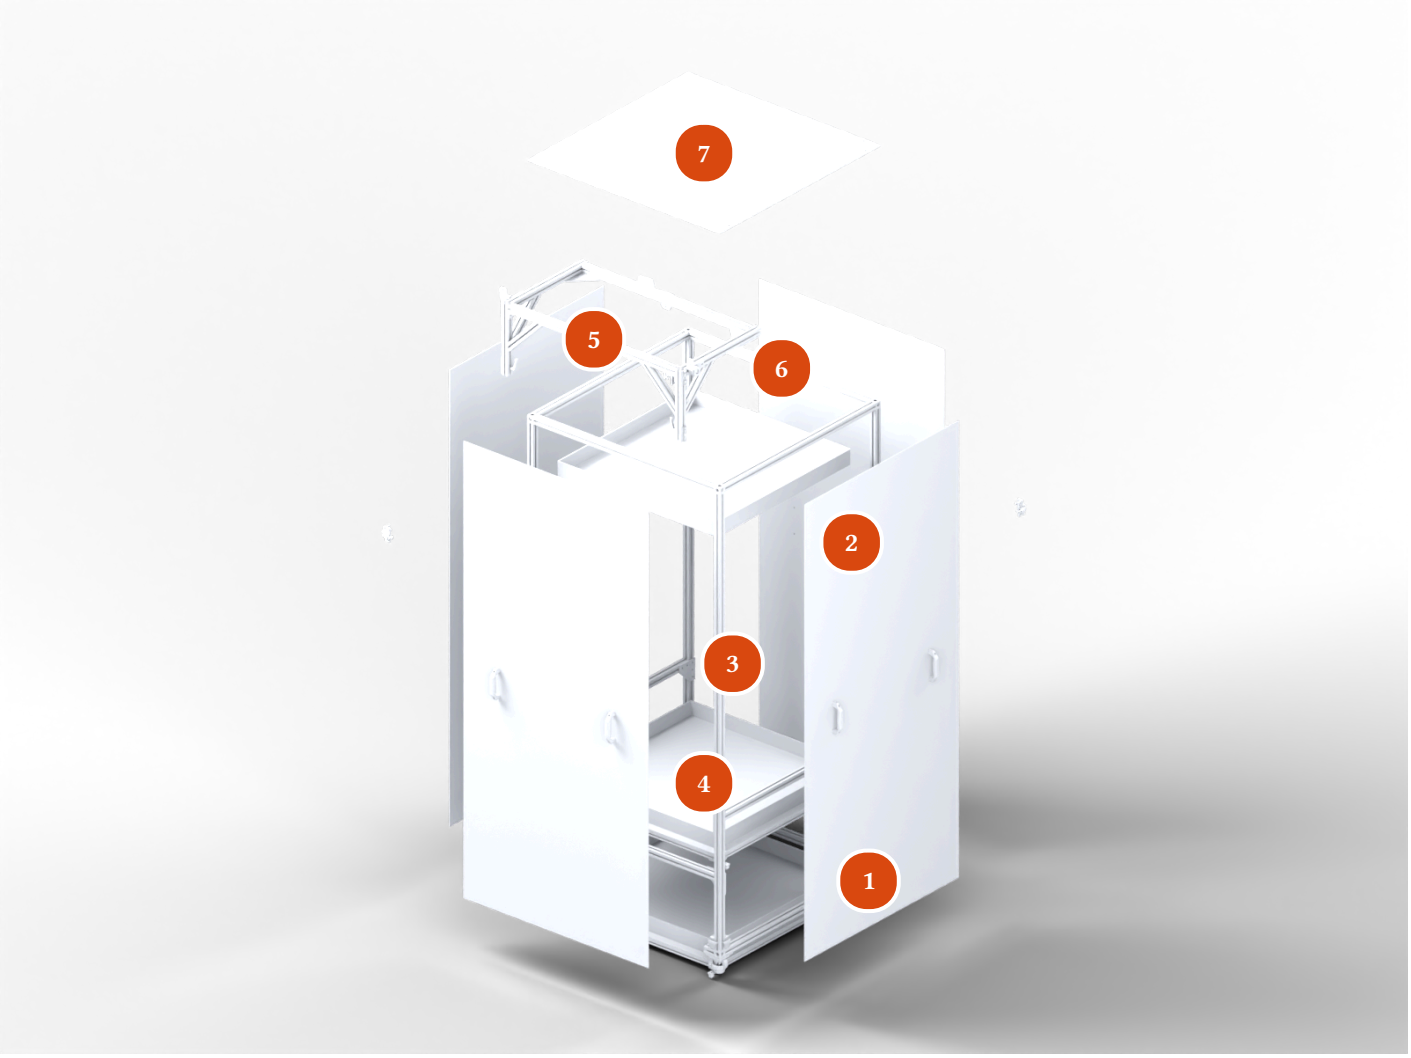

Illustration offsets only (recorded in manual.json); nothing here is an assembly order.

#	Subassembly	Instances	Page

Parts

CAD qty is the number of instances of the part in the CAD model (reference-only geometry excluded). It is not a purchase quantity: purchased kits, pack sizes, spares and stock are not reconciled. The large number is the quantity for phase-1 (this build); conditional and deferred quantities are stated beside it. Write the quantity you count in the box.

Supplementary items (not modelled in CAD)

Supplementary items are hardware, consumables or purchased items that are not modelled in CAD. They are listed for review and are never added to CAD quantities; an unknown quantity stays unknown. This is not an approved bill of materials. Status: draft: rows converted from the project procurement sheet; candidate item families, not an approved BOM; quantities unknown unless stated; never added to CAD counts.

#	Item	Kind, status	Required	Stock	Included with	Config. confirmed	counted
S1	**Caster-to-mounting-plate fastening** `SUP-001` joint `caster_to_plate` attaches to: CASTER ASSEMBLY:1, CASTER ASSEMBLY:2, CASTER ASSEMBLY:3, CASTER ASSEMBLY:4	item family, no SKU candidate, requires review	required unknown (family, not specified); basis: 4 caster assemblies; attachment points per caster unverified	on hand unknown	—	no	☐

4 identical instances of this subassembly in the CAD model; the last column is the CAD count for all 4 (an instance count, not a purchase quantity). 3 occurrence(s) in the shown instance; ids in manual.json and the appendix.

Hardware to review at this joint (not an approved BOM)

- S3 Pull-handle-to-panel fastening · candidate, requires review · required unknown (family, not specified); basis: 8 handles on 4 panels; fastening points per handle unverified · joint `handle_to_panel`
- S16 Removable-panel retention interface · candidate, requires review · required unknown (family, not specified); basis: 4 panels, 8 lower supports, 8 toggle clamps · joint `panel_retention`

Subassembly 3: TOGGLE CLAMP ASSEMBLY (4 in this project)

shown: `TOGGLE CLAMP ASSEMBLY:1` under `root` · other instances: `TOGGLE CLAMP ASSEMBLY:2`, `TOGGLE CLAMP ASSEMBLY:3`, `TOGGLE CLAMP ASSEMBLY:4` · definition from the exporter's document

inspection view: occurrences at their CAD poses; not an assembly step; no sequence, fasteners or tool access implied.

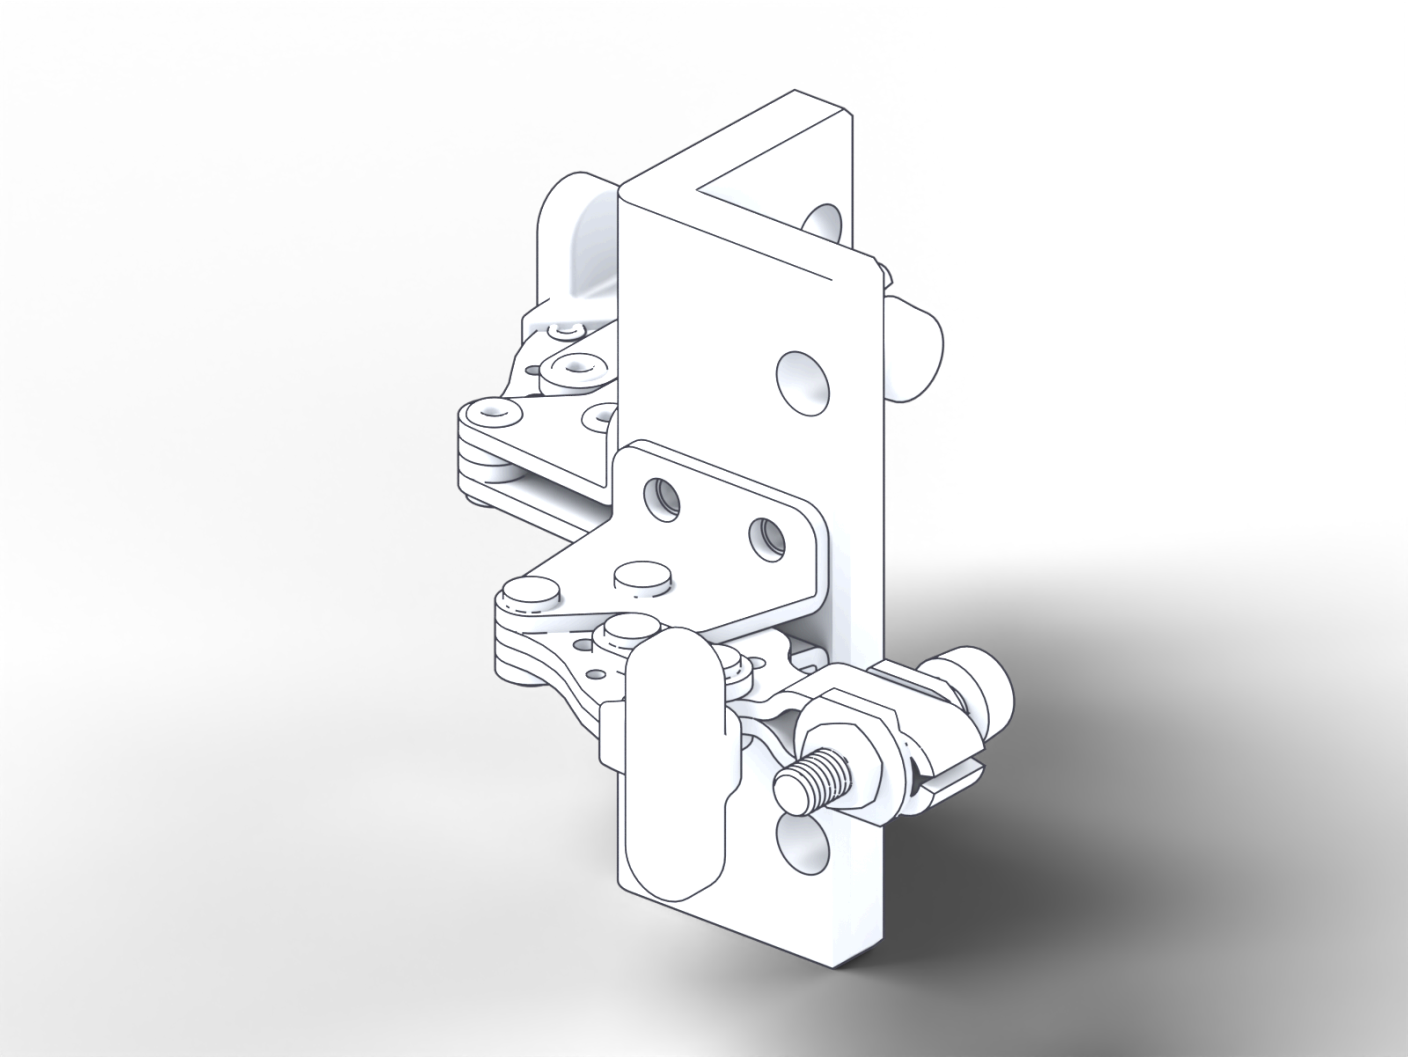

Figure 4: Subassembly 3: TOGGLE CLAMP ASSEMBLY, instance `TOGGLE CLAMP ASSEMBLY:1`, parts at their CAD positions (inspection view).

#	Picture	Part	Per subassembly	For all 4
35		MCMASTER 5004A11 Compact Hold-Down Toggle Clamp	×2	×8
36		TOGGLE CLAMP MOUNT	×1	×4

4 identical instances of this subassembly in the CAD model; the last column is the CAD count for all 4 (an instance count, not a purchase quantity). 3 occurrence(s) in the shown instance; ids in manual.json and the appendix.

Hardware to review at this joint (not an approved BOM)

- S4 Toggle-clamp-to-mount fastening · candidate, requires review · required unknown (family, not specified); basis: 8 clamps on 4 mounts; points per clamp unverified · joint `clamp_to_mount`
- S5 Toggle-clamp-mount-to-frame fastening · candidate, requires review · required unknown (family, not specified); basis: 4 mounts; points per mount unverified · joint `clamp_mount_to_frame`

- **S16** Removable-panel retention interface · candidate, requires review · required unknown (family, not specified); basis: 4 panels, 8 lower supports, 8 toggle clamps · joint `panel_retention`

Subassembly 4: TANK SUPPORT FRAME (2 in this project)

shown: `TANK SUPPORT FRAME:1` under `root` · other instance: `TANK SUPPORT FRAME:2` · definition from the exporter's document

inspection view: occurrences at their CAD poses; not an assembly step; no sequence, fasteners or tool access implied.

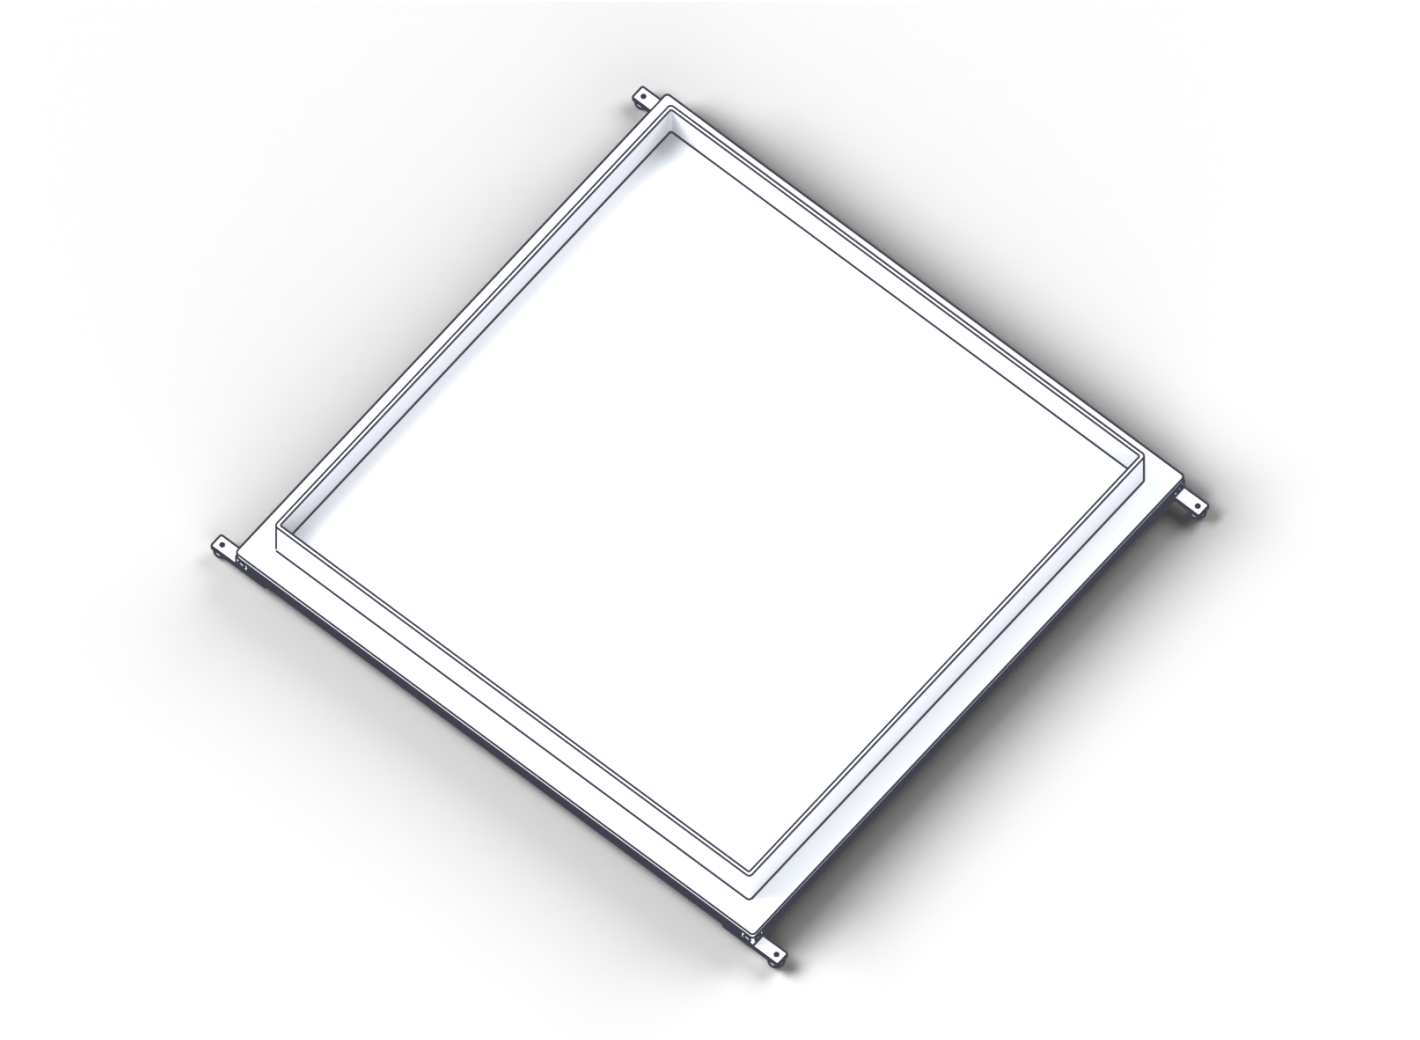

Figure 5: Subassembly 4: TANK SUPPORT FRAME, instance `TANK SUPPORT FRAME:1`, parts at their CAD positions (inspection view).

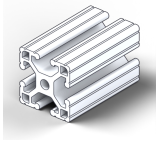
Step 1

[bottom-frame]

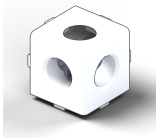
PARTS NEEDED

28 ×2



23 ×3

24 ×4



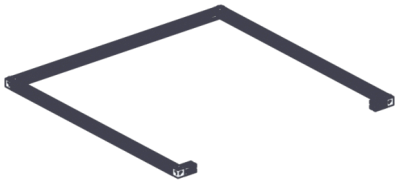


Figure 24: Place as shown.

Lay out the bottom frame: lower rails and corner connectors. Order among rails is free; square the frame before tightening. Hardware: see joints main_frame_joints.

Step 2

[casters] after bottom-frame

PARTS NEEDED

27 ×4

26 ×4

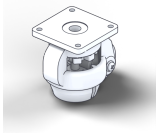

Figure 25: Place as shown.

Bolt each caster to its mounting plate and attach the four plates under the bottom frame corners (joints caster_to_plate, caster_plate_to_frame). Hardware unverified.

Step 3

[columns] after casters

PARTS NEEDED

25 ×4

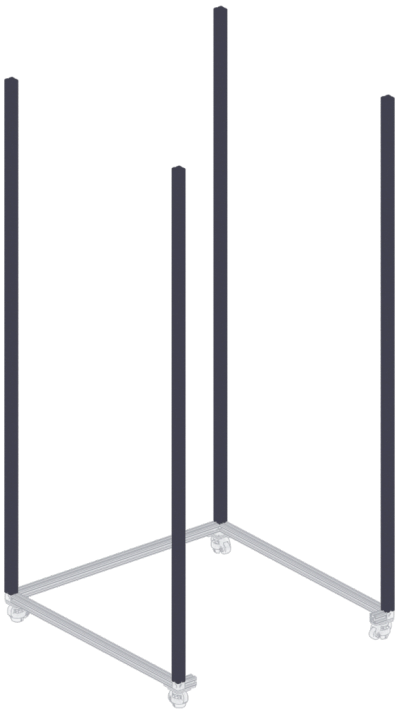

Figure 26: Place as shown.

Stand the four 96 in columns on the bottom frame corners.

Step 4

[middle-rails] after columns

PARTS NEEDED

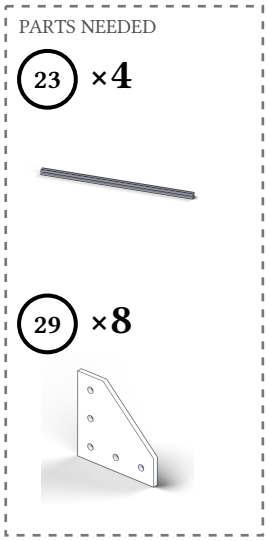

Figure 27: Place as shown.

Add the mid-height rails and extrusions between the columns.

Step 5

[top-frame] after middle-rails

PARTS NEEDED

23 ×4

24 ×4

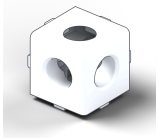

Figure 28: Place as shown.

Close the top frame: upper rails and corner connectors.

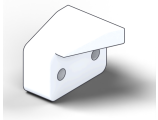
Step 6

[lower-supports] after top-frame

PARTS NEEDED

30 ×4

31 ×4



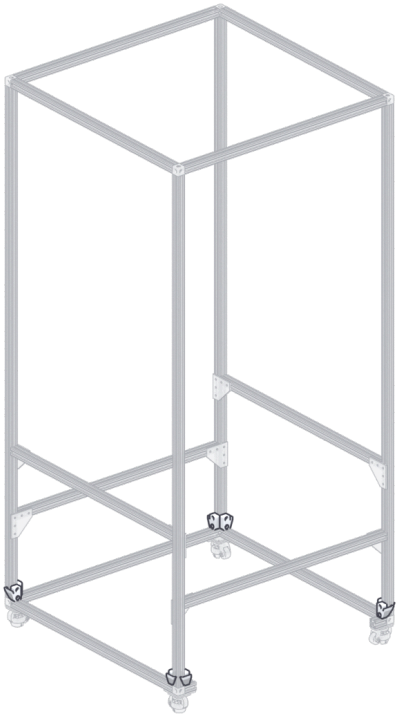


Figure 29: Place as shown.

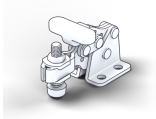
Fit the eight panel lower supports (left and right) to the frame (joint lower_support_to_frame).

Step 7

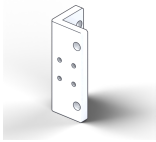
[toggle-clamps] after lower-supports

PARTS NEEDED

35 ×8



36 ×4



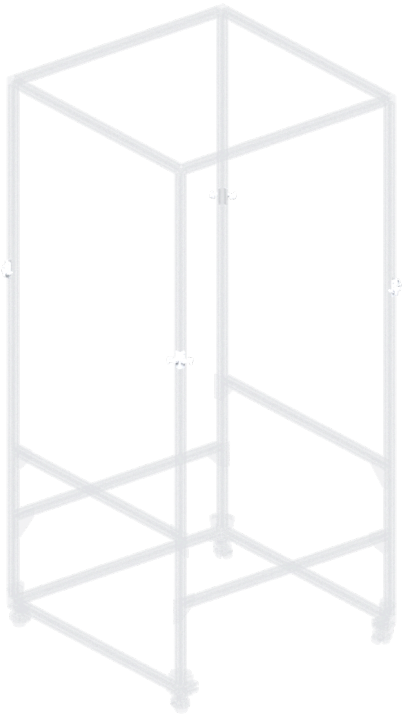


Figure 30: Place as shown.

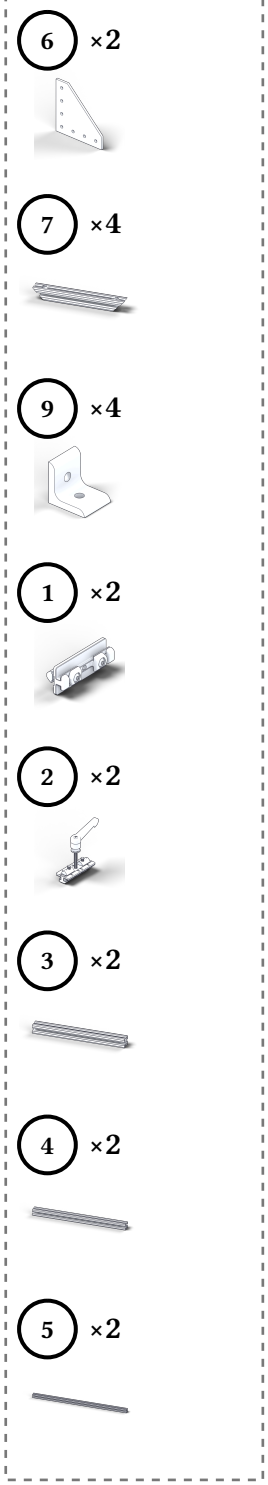
Assemble the four toggle-clamp mounts (two clamps each) and attach them to the columns (joints clamp_to_mount, clamp_mount_to_frame).

Step 8

[camera-frame-structure] after toggle-clamps

PARTS NEEDED



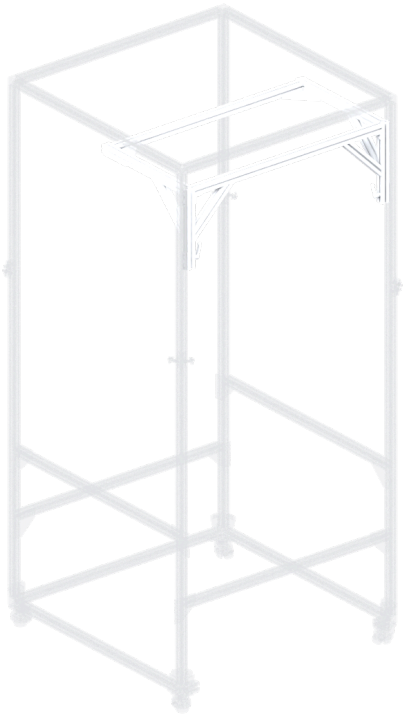


Figure 31: Place as shown.

Assemble the camera frame extrusions and corner brackets (joint camera_frame_joints).

Step 9

[camera-frame-mechanism] after camera-frame-structure

PARTS NEEDED

10 ×4

11 ×2

8 ×2

13 ×2

14 ×2

12 ×2

Figure 32: Place as shown.

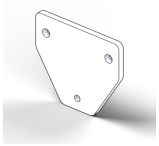
Fit the roller and spring mechanism: roller plates, spring plates, rollers, bearings, shoulder screws, springs (joint spring_roller).

Step 10

[camera-plates] after camera-frame-mechanism

PARTS NEEDED

15 ×1



16 ×1

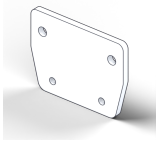


Figure 33: Place as shown.

Fit the camera mount plates (joints camera_plates, camera_attachment). The camera itself is not in CAD.

Step 11

[panel-1] after camera-plates

PARTS NEEDED

32 ×1

33 ×2

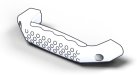

Figure 34: Place as shown.

Fit two pull handles to panel 1 (joint handle_to_panel) and hang the panel on its lower supports and toggle clamps (joint panel_retention).

Step 12

[panel-2] after panel-1

PARTS NEEDED

32 ×1

33 ×2

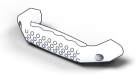

Figure 35: Place as shown.

Fit two pull handles to panel 2 (joint handle_to_panel) and hang the panel on its lower supports and toggle clamps (joint panel_retention).

Step 13

[panel-3] after panel-2

PARTS NEEDED

32 ×1

33 ×2

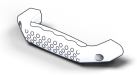

Figure 36: Place as shown.

Fit two pull handles to panel 3 (joint handle_to_panel) and hang the panel on its lower supports and toggle clamps (joint panel_retention).

Step 14

[panel-4] after panel-3

PARTS NEEDED

32 ×1

33 ×2

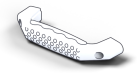

Figure 37: Place as shown.

Fit two pull handles to panel 4 (joint handle_to_panel) and hang the panel on its lower supports and toggle clamps (joint panel_retention).

Step 15

[top-panel] after panel-4

PARTS NEEDED

34 ×1

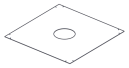

Figure 38: Place as shown.

Place the top panel (joint top_panel: nothing in CAD retains it).

Step 16

[conditional-tank-support-frame-1] after top-panel **CONDITIONAL: install in phase 1 only if it cannot be installed after the frame and panels are assembled; otherwise defer with the tanks**

PARTS NEEDED

20 ×4

19 ×4

18 ×4

22 ×4

21 ×1

17 ×4

Figure 39: Place as shown.

CONDITIONAL (build-scope.json): TANK SUPPORT FRAME:1, the tank support frame. Install now only if it cannot be installed after the panels; otherwise defer with the tanks. Joints support_frame_corners, support_brackets, vibration_mounts.

Step 17

[conditional-tank-support-frame-2] after conditional-tank-support-frame-1 **CONDITIONAL: install in phase 1 only if it cannot be installed after the frame and panels are assembled; otherwise defer with the tanks**

PARTS NEEDED

20 ×4

19 ×4

18 ×4

22 ×4

21 ×1

17 ×4

Figure 40: Place as shown.

CONDITIONAL (build-scope.json): TANK SUPPORT FRAME:2, the tank support frame. Install now only if it cannot be installed after the panels; otherwise defer with the tanks. Joints support_frame_corners, support_brackets, vibration_mounts.

Deferred steps (not in this build)

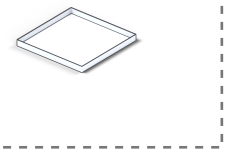
These steps place items outside phase-1; they are shown seated on the finished build for completeness and are not part of the build sequence above.

Step 18

[deferred-tanks] after conditional-tank-support-frame-2 **DEFERRED: not in this build**

PARTS NEEDED

37 ×3



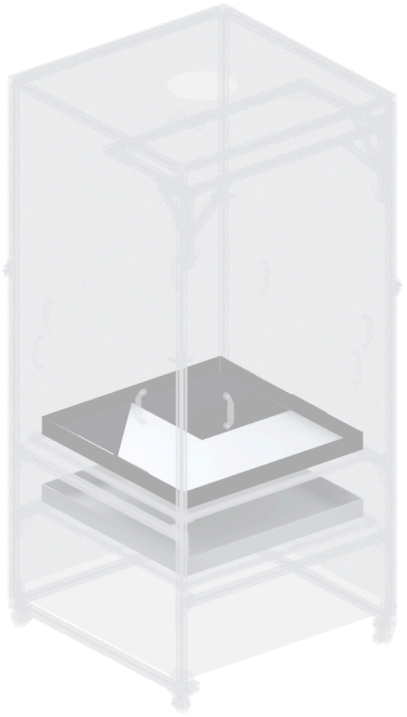


Figure 41: Place as shown.

DEFERRED (build-scope.json): the tanks are not part of phase 1 and are listed here only because every CAD occurrence must appear once. They are to be replaced by monitors and bowls.

Build record

Supplementary items, every field

Supplementary items are hardware, consumables or purchased items that are not modelled in CAD. They are listed for review and are never added to CAD quantities; an unknown quantity stays unknown. This is not an approved bill of materials. kind: project-csv. csv: assembly/procurement/supplementary-bom.csv. csv_sha256: 715ac8d3ad89ef0bdf6c7e02b55a217f5d99334ead6b0adddba8d8d3a7baeba3. joint_audit: assembly/procurement/joint-audit.json. joint_audit_sha256: 00c2e187c167fd00110095ca92e169972b4b0fa18f1d055386753cb1ac7f51e2. native_bom_audit_run: vault-cad-exchange/evidence/2026-10-22-windows-native-bom-audit-01.

#	item_id, joint_id, scope	kind, status	family / specification	quantities	included_with, attaches_to	supplier, cost, evidence
S1	SUP-001 joint caster_to_plate scope existing	family candidate_requires_review confirmed false	Caster-to-mounting-plate fastening null basis: 4 caster assemblies; attachment points per caster unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: FREE STANDING FRAME:1/CASTER ASSEMBLY:1; FREE STANDING FRAME:1/CASTER ASSEMBLY:2; FREE STANDING FRAME:1/CASTER ASSEMBLY:3; FREE STANDING FRAME:1/CASTER ASSEMBLY:4	supplier_part_number null verified false unit_cost null Each caster group contains caster and plate only. Caster is a compound purchased model. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Inspect caster drawing/kit bag and plate holes; determine bolt/nut/washer stack and whether hardware is supplied.
S2	SUP-002 joint caster_plate_to_frame scope existing	family candidate_requires_review confirmed false	Caster-plate-to-frame fastening null basis: 4 plates; frame attachments per plate unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: FREE STANDING FRAME:1; FREE STANDING FRAME:1/CASTER ASSEMBLY:1; FREE STANDING FRAME:1/	supplier_part_number null verified false unit_cost null No separate fasteners in caster groups; parent frame connectors may cover some joints. Native BOM audit

#	item_id, joint_id, scope	kind, status	family / specification	quantities	included_with, attaches_to	supplier, cost, evidence
					CASTER ASSEMBLY:2; FREE STANDING FRAME:1/CASTER ASSEMBLY:3; FREE STANDING FRAME:1/CASTER ASSEMBLY:4	2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Identify slot versus tapped-end mounting; confirm extrusion series, threads, engagement and supplied hardware.
S3	SUP-003 joint handle_to_panel scope existing	family candidate_requires_review confirmed false	Pull-handle-to-panel fastening null basis: 8 handles on 4 panels; fastening points per handle unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: PANEL ASSEMBLY:1; PANEL ASSEMBLY:2; PANEL ASSEMBLY:3; PANEL ASSEMBLY:4	supplier_part_number null verified false unit_cost null Each panel group contains one panel and two handles only; filenames describe unthreaded holes. Native BOM audit 2026-10-22: category d (absent from all native sources); no Vault drawing exists for any source file. next_check Inspect both sides of panel and handle drawing; choose bolt/nut/washer stack for actual panel thickness.
S4	SUP-004 joint clamp_to_mount scope existing	family candidate_requires_review confirmed false	Toggle-clamp-to-mount fastening null basis: 8 clamps on 4 mounts; points per clamp unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: TOGGLE CLAMP ASSEMBLY:1; TOGGLE CLAMP ASSEMBLY:2; TOGGLE CLAMP ASSEMBLY:3; TOGGLE CLAMP ASSEMBLY:4	supplier_part_number null verified false unit_cost null Each clamp group contains two compound clamps and one mount only. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Distinguish factory clamp adjustment hardware from base mounting screws; inspect mount holes/inserts and kit contents.
S5	SUP-005 joint clamp_mount_to_frame scope existing	family candidate_requires_review confirmed false	Toggle-clamp-mount-to-frame fastening null basis: 4 mounts; points per mount unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: TOGGLE CLAMP ASSEMBLY:1; TOGGLE CLAMP ASSEMBLY:2; TOGGLE CLAMP ASSEMBLY:3; TOGGLE CLAMP ASSEMBLY:4	supplier_part_number null verified false unit_cost null No separate mounting fasteners in clamp groups. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Inspect printed mount connection and slots; identify inserts/T-nuts and bolt stack if needed.
S6	SUP-006 joint lower_support_to_frame scope existing	family candidate_requires_review confirmed false	Panel-lower-support fastening null basis: 4 left + 4 right supports; points per support unverified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: FREE STANDING FRAME:1	supplier_part_number null verified false unit_cost null Eight support occurrences in main frame; no standalone matching fastener identified by scene names. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Inspect supports for integral clip versus screw attachment; determine left/right fastening scheme before adding hardware.
S7	SUP-007 joint main_frame_joints scope existing	family candidate_requires_review confirmed false	Main-frame connector hardware and joint completeness null	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: FREE STANDING FRAME:1	supplier_part_number null verified false unit_cost null Eight 47065T245 occurrences

#	item_id, joint_id, scope	kind, status	family / specification	quantities	included_with, attaches_to	supplier, cost, evidence
			basis: 11 long rails + 4 columns + 2 short rails; joint count requires review			have hidden bodies; other connectors may have integrated hardware. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Map every rail-end joint; verify connector kit contents, slot/end machining, captive hardware and any unmodeled brackets.
S8	SUP-008 joint camera_frame_joints scope existing	family candidate_requires_review confirmed false	Camera-frame connector and bracket hardware null basis: 4 named 47065T845 brackets plus other connector/sliding parts	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: CAMERA FRAME:1	supplier_part_number null verified false unit_cost null Sliding/connector models contain multiple bodies; bracket attachment hardware not separately identified. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Check each connector product drawing and kit before counting extra screws/T-nuts; inspect camera-frame-to-main-frame joints.
S9	SUP-009 joint support_frame_corners scope existing	family candidate_requires_review confirmed false	Tank-support-frame corner hardware null basis: 8 modeled corner connectors across 2 support frames	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: TANK SUPPORT FRAME:1; TANK SUPPORT FRAME:2	supplier_part_number null verified false unit_cost null Each 47065T242 has five visible bodies; these may already represent kit hardware. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Confirm assembly selection and kit bill; count loose/missing contents against kit without double-counting.
S10	SUP-010 joint support_brackets scope existing	family candidate_requires_review confirmed false	Tank-support-bracket attachment hardware null basis: 8 brackets across 2 support frames	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: TANK SUPPORT FRAME:1; TANK SUPPORT FRAME:2	supplier_part_number null verified false unit_cost null Brackets are modeled; their full fastening stacks are not identified from names. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Review bracket-to-frame and bracket-to-platform joints, holes and purchased hardware.
S11	SUP-011 joint vibration_mounts scope existing	family candidate_requires_review confirmed false	Vibration-mount retention hardware null basis: 8 mounts + 8 oversized washers modeled	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: TANK SUPPORT FRAME:1; TANK SUPPORT FRAME:2	supplier_part_number null verified false unit_cost null Washers are already modeled; no separately named matching nuts in this scene. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault

#	item_id, joint_id, scope	kind, status	family / specification	quantities	included_with, attaches_to	supplier, cost, evidence
						drawing exists for any source file. next_check Determine stud/thread arrangement and retained sides; check included nuts/other washers and support configuration.
S12	SUP-012 joint camera_plates scope existing	family candidate_requires_review confirmed false	Camera, spring and roller plate attachment hardware null basis: 2 roller plates + 2 spring plates + 2 different camera plates	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: CAMERA FRAME:1	supplier_part_number null verified false unit_cost null Plates are modeled; general mounting screws/T-nuts are not separately identified. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Determine whether camera plates are stacked or alternatives; map plate-to-frame and plate-to-plate fastening points.
S13	SUP-013 joint spring_roller scope existing	family candidate_requires_review confirmed false	Spring end and roller/bearing retention hardware null basis: 2 springs + 2 rollers + 4 bearings + 2 shoulder screws modeled	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: CAMERA FRAME:1	supplier_part_number null verified false unit_cost null Two shoulder screws already exist; bearing internals are compound geometry. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Verify shoulder screw threads, spacers/retainers and both spring-end attachments; do not purchase bearing internals separately.
S14	SUP-014 joint camera_attachment scope existing	family candidate_requires_review confirmed false	Camera-to-mount attachment null basis: Camera plate variants present; actual camera selection unconfirmed	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: CAMERA FRAME:1	supplier_part_number null verified false unit_cost null Camera itself is not among the 37 part definitions. Native BOM audit 2026-10-22: category a2 (exported hardware rows exist in these groups but cannot be assigned to this joint by the BOM); no Vault drawing exists for any source file. next_check Confirm camera supplied/needed and its selected interface drawing, screws and available thread depth.
S15	SUP-015 joint top_panel scope existing	family candidate_requires_review confirmed false	Top-panel retention and edge/support interface null basis: 1 enclosure top panel	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: ENCLOSURE TOP PANEL:1	supplier_part_number null verified false unit_cost null Panel is at scene root; retention hardware not identified. Native BOM audit 2026-10-22: category d (absent from all native sources); no Vault drawing exists for any source file. next_check Check whether panel rests, clips or screws into frame; do not invent fasteners for intentionally removable panels.
S16	SUP-016 joint panel_retention scope existing	family candidate_requires_review confirmed false	Removable-panel retention interface null basis: 4 panels, 8 lower supports, 8 toggle clamps	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: FREE STANDING FRAME:1; PANEL ASSEMBLY:1; PANEL ASSEMBLY:2; PANEL ASSEMBLY:3;	supplier_part_number null verified false unit_cost null Model includes supports and clamps that may form the complete retention

#	item_id, joint_id, scope	kind, status	family / specification	quantities	included_with, attaches_to	supplier, cost, evidence
					PANEL ASSEMBLY:4; TOGGLE CLAMP ASSEMBLY:1; TOGGLE CLAMP ASSEMBLY:2; TOGGLE CLAMP ASSEMBLY:3; TOGGLE CLAMP ASSEMBLY:4	mechanism. Native BOM audit 2026-10-22: category e (unknown: only compound purchased models, no hardware row); no Vault drawing exists for any source file. next_check Check mating pads, wear strips or stops only if required; avoid counting clamp hardware again under this row.
S17	SUP-017 joint monitor_mount scope new_design	family candidate_requires_review confirmed false	Removable monitor support and acrylic interface null basis: 2 monitors requested; mount design not yet selected	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: []	supplier_part_number null verified false unit_cost null Current accepted enclosure scene has no monitor mount or AW2725Q occurrences. next_check Design support/removal method and acrylic interface; identify fabrication parts, brackets and connection hardware after design review.
S18	SUP-018 joint monitor_fasteners scope new_design	family candidate_requires_review confirmed false	Monitor attachment fasteners null basis: 2 monitors; VESA hole count/thread/engagement must be verified	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: []	supplier_part_number null verified false unit_cost null Reference drawing records 100 x 100 mm spacing only; no fastening specification. next_check Check AW2725Q manufacturer mounting requirements and real monitor; choose length from bracket stack plus allowed engagement, not hole spacing.
S19	SUP-019 joint bowl_frame scope new_design	family candidate_requires_review confirmed false	Bowls, bowl frame and frame attachments null basis: Approximately 12 bowls (6 per monitor), pending customer dimensions	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: []	supplier_part_number null verified false unit_cost null Bowls/frame are not in this frozen scene. next_check Confirm outer/rim dimensions and final layout; prototype before specifying quantities/materials for final purchase.
S20	SUP-020 joint cabling_supplies scope new_design	family candidate_requires_review confirmed false	Cables, strain relief and installation supplies null basis: Routing and available supplied cables unreviewed	confirmed_required_each null on_hand_each null on_order_each null	null attaches_to: []	supplier_part_number null verified false unit_cost null No cable/consumable models or physical inventory in this snapshot. next_check Survey supplied cables, power/access needs and routing; add individual ties, clips, pads or other consumables only when specified.
